

Ameri-PAK 27 Product Bulletin

Ameri-PAK 27 is formulated to use with braided packing in pumps and valves requiring a 400 degree Fahrenheit operating temperature and a pH range of 2-12. Ameri-PAK 27 is compounded with ultra hi-temperature lubricants and contain G.F.O. type base fibers. Ameri-PAK 27 makes an excellent valve stem packing and should be used where a no-lead metal coag is required. Ameri-PAK 27 contains no asbestos . Bull rings for top and bottom are recommended, preferably a graphite teflon or braided G.F.O
