

## *Ameri-PAK 29 Product Bulletin*

*Ameri-PAK 29 is formulated to use with braided packing in pumps and valves requiring a 500 degree Fahrenheit operating temperature and a pH range of 2-12.*

*Ameri-PAK 29 is a blend of synthetic fibers and non-staining lubricants for general services.*

*Ameri-PAK 29 makes an excellent centrifugal, or reciprocating pump packing. It is also excellent as a valve stem packing.*

*Ameri-PAK 29 contains no asbestos . Bull rings for top and bottom are recommended, preferably a PTFE (Teflon) braided packing. Packings with Kevlar packing on the corners will extend the life of the bull ring reducing leakage and loss of injectable packing.*
